

Trafikkdata Norway

Knut H. Pedersen

Data obtained from Statens Vegvesen¹

Sensors around in Norway

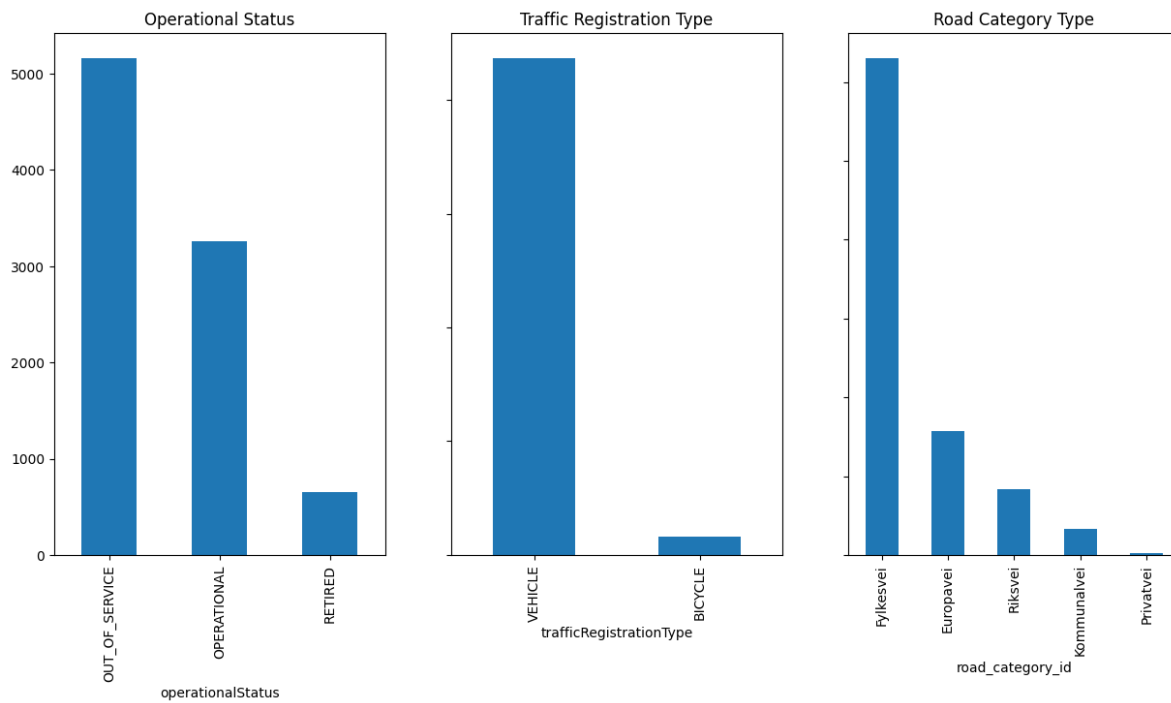

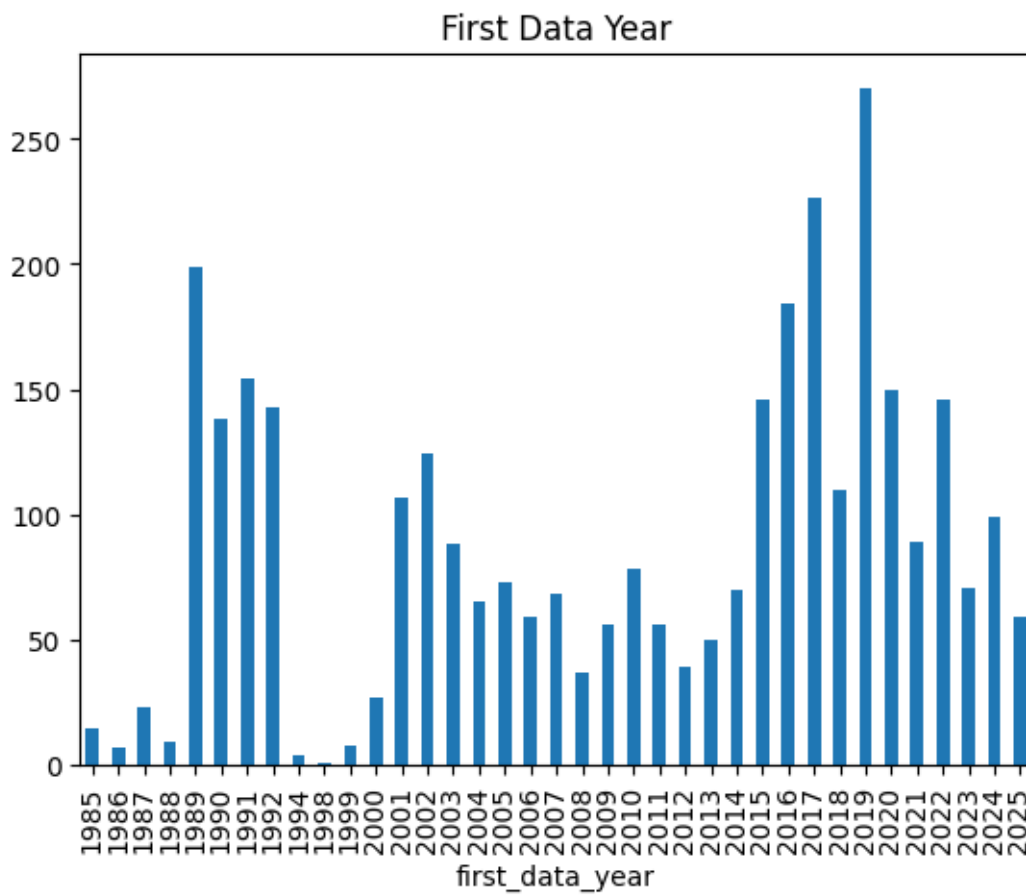

Figure 1: Statistics of traffic registration points

As seen in Figure 1 there are many sensors out of service, or maybe some sensors are moved around to different locations. Vehicle measurements are more common than bicycle measurements. Most sensors are located on *Fylkesvei*

¹Contains data under the Norwegian licence for Open Government data (NLOD) distributed by the Norwegian Public Roads Administration.

Looking at first year of data
